## **Facilities and Equipment**

The College's campus facility is located in a commercial building which is conveniently located in a Downtown area, with parking nearby. The facility is well maintained and periodically updated to meet the changing educational requirements brought about by the rapidly changing demands placed on today's workforce; however, the facility will always include at a minimum

two or more computer labs, a basic resource center, a medical lab, a nursing lab, general purpose classrooms, restrooms, a student lounge/resource center, and administrative offices. Applicants for admission have the option to visit the campus and review the facilities and equipment during or prior to the admissions process and prior to enrolling. Additionally, there is access into the building on the first, second, and third floors.

The College maintains computer labs, which contain computer hardware and software. The institution periodically updates or changes its hardware and software to meet student educational requirements and local market needs, but each computer lab will normally contain at least twenty computers. Software applications in which the student receives instruction will vary based on the student's specific program; however, the software that the institution utilizes includes common applications such as word processing, database applications and spreadsheet applications, as well as specialized applications for more advanced classes.

The College maintains various types of medical instruments/equipment and pharmacy instruments and equipment in its medical lab, pharmacy lab, and nursing lab for the clinical and lab training of medical, pharmacy, and nursing students in programs that include a clinical or lab component. The equipment includes the type of equipment typically found in a doctor's office clinic, or pharmacy. The equipment includes: Examination table with stool, supply storage cabinets, examination tools of various kinds, blood pressure cuffs, stethoscopes, sterile processing supplies, laminar air flow hoods, point of sale technology, class 3 prescription balance, compounding hotplate with magnetic stirrer, various types of minor surgery equipment and CPR materials.

Building regulations may be posted in the resource center or other locations throughout the facility. Students are also familiarized with the building regulations during orientation. Failure to comply with building regulations may result in disciplinary action, including termination from school. Any student who damages the campus buildings, grounds or equipment will be held financially responsible. Smoking is prohibited anywhere in the building.

## **PLAN FOR IMPROVING THE INSTITUTION'S ACADEMIC PROGRAMS**

The institution is always reviewing its academic programs to provide students with the most current and relevant education necessary to enhance employability. For specific current information on improvement plans to any academic program (if any), please contact the Campus President.

## **FACULTY LISTING**
